Console.log (orderNumber)
17. let ColorType = 47
Console.log (colorType)
18. let taxPlate = 92.0
Console.log (taxPlate)

Boolean.

1. `const openNow = True;`
`console.log(openNow);`
2. `const closeNow = True;`
`console.log(closeNow);`
3. `const studentPresent = True`
`console.log(studentPresent)`
4. `const IsPlaced = True`
`console.log(IsPlaced)`
5. `const studentAttend = True`
`console.log(studentAttend)`
6. `const studentAbsent = True`
`console.log(studentAbsent)`
7. `const profileOpen = True`
`console.log(profileOpen)`
8. `const profileClose = True`
`console.log(profileClose)`
9. `const officeRun = True`
`console.log(officeRun)`
10. `const companyHire = True`
`console.log(companyHire)`
11. `const userStudent = False`
`console.log(userStudent)`
12. `const userEmployee = False`
`console.log(userEmployee)`
13. `const studentProfile = False`
`console.log(studentProfile)`
14. `const IS Experienced = False`
`console.log(IS Experienced)`
15. `const studentOption = False`
`console.log(studentOption)`
16. `const ExamResult = False`
`console.log(ExamResult)`
17. `const getoffer = false`
`console.log(getoffer)`

18. `const getDiscount = False`
`console.log(getDiscount)`
19. `const Is taxRate = False`
`console.log(Is taxRate)`
20. `const studentPresent = False`
`console.log(studentPresent)`

Null

- 1) `var studentMobile = Null;`
`console.log(studentMobile);`
2. `var profileList = Null;`
`console.log(profileList);`
3. `const officeProfile = Null;`
`console.log(officeProfile);`

Undefined

- 1) `var StudentName;`
`console.log(studentName)`
- 2) `const userProfile;`
`console.log(userProfile)`
- 3) `let company Name;`
`console.log(company Name)`
